| IDENTIFIERS | Toledo Public Schools OH |

ABSTRACT

In response to declining student enrollment, the Toledo, Ohio public school system conducted a school utilization study involving the evaluation of eight categories of achievement. These categories were: (1) educational adequacy as determined by the ability of the facility to meet the requirements of a good instructional program; (2) an overview of operational costs which included overhead per student for support personnel and utilities; (3) current and projected enrollments; (4) environmental influences such as noise pollution, play area, lighting and security, flooding, and the condition of adjacent properties; (5) alternate or non-school use of facilities; (6) modernization potential based on age and general condition of the physical structure, renovation complexity and code compliance, and access for the physically handicapped; (7) capacity; and (8) traffic and safety controls. Each category was ranked across the school system, and the data results for each school are included in this report. (JCD)

TOLEDO PUBLIC SCHOOLS

SCHOOL UTILIZATION STUDY

SECOND YEAR STUDY

During the 1979-1980 school year, as a result of recommendations made to the Toledo Board of Education in the CCEG report, and due to a decline in student enrollment, the Toledo Public School system conducted a school utilization study.

A building utilization instrument was created and this survey tool allowed the ranking of schools based on the total score achieved in eight general categories. A list of the categories and a brief explanation of each follows:

| CATEGORY | POINTS |
|---|---|
| 1. Educational Adequacy | 20 |
| 2. Operating Costs | 20 |
| 3. Enrollment, Current and Projected | 20 |
| 4. Environment | 10 |
| 5. Alternate Use | 10 |
| 6. Modernization Potential | 8 |
| 7. Capacity | 8 |
| 8. Traffic and Safety | 4 |
| TOTAL | 100 |

1. EDUCATIONAL ADEQUACY

This portion assessed the ability of the facility to meet the requirements of a good instructional program. The language used is taken primarily from the Ohio Minimum Standards for Schools.

2. OPERATION COSTS

This category is an overview of overhead per student including support personnel and utilities. Also overhead per square foot including support costs. A utility factor was also included in this category.

3. ENROLLMENT, CURRENT AND PROJECTED

This item deals with the relationship of enrollment to capacity. Figures used are both current and projected enrollment. Capacity was determined by multiplying the number of classrooms in a building by 30. (Projections were based on a school's retention rate, birthrate and cohort survival technique for the past 3 years.

4. ENVIRONMENTAL IMPACT

This section evaluates the environment in the area adjacent to the school. Factors rated included noise pollution, play area, lighting and security, condition of adjacent properties and flooding.

UD021786

5. ALTERNATE USE

This portion analyzes the possibility of non-school use for the present school facilities. This included a study of location, zoning and the degree of interest in the building and/or site expressed by others.

6. MODERNIZATION POTENTIAL

This is a rating of schools based on modernization potential. Factors considered involve: Age and general condition of the structure, renovation complexity and code compliance, and an evaluation of the school's current access for the physically handicapped.

7. CAPACITY

Credit is awarded if a school meets or exceeds the minimum size generally recommended.

8. TRAFFIC AND SAFETY

This section rates schools based on traffic and other hazards, and the degree to which those hazards are controlled. Also included is an evaluation of those factors which make a building safe.

The School Utilization study resulted in the closing of eight elementary buildings, one junior high school and one high school. The reorganization of two elementary buildings to junior high schools was also accomplished.

The School Utilization survey instrument, with slight modification was used in this, the second year utilization study.

As in the original, the second utilization study involved scoring each building in the eight areas as previously discussed. This was done after all information and data gathered in the first study were reevaluated and brought up-to-date.

Of these eight areas, only item #2, Operating Costs and item #3, Enrollment were substantially affected by the Junior High Reorganization and the closings.

Item #2, Operating Costs, was made current using 1980 operating costs and the October, 1980 enrollment figures.

Item #3, Enrollment, was brought up-to-date using October, 1980 figures and a three year projection based on a school's retention rate, birthrate and the cohort survival technique for the past three years.

The next task in the second year study was meetings with each of the building principals. These meetings entailed each principal reviewing and evaluating the information which concerned his/her building. They then supplied information necessary to complete the Educational Adequacy and Enrollment portions of the survey and participated in the final scoring of his/her school.

Also noteworthy, is the fact that the survey instrument made provisions for indicating any special circumstances that might presently affect or soon affect a specific building. This information was provided by building principals, the business department, the system's engineers, and the Lucas County Planning Commission. The following are examples of circumstances that were noted:

> Present and future housing growth and the need for additional major expenditures for such items as boilers, windows, roofs, flood control, plumbing and electrical work.

The following is the ranking of each school according to their total score. Also, detailed graphs and charts of all gathered information for elementary, junior high and senior high buildings:

| Jefferson Center | 52.0 |
| Libbey | 51.3 |
| Scott High School | 46.6 |

## SCHOOL RANKINGS BY TOTALING MODERNIZATION POTENTIAL, ENROLLMENT, AND OPERING COST

The following school rankings are based on a total of three categories: Modernization Potential, Enrollment, and Operating Cost. These rankings were done due to information gained from Toledo Public School's 1979 Needs Assessment. Those surveyed indicated that the above three items were the most important factors to consider when studying possible school closures.

### Elementary

| | | | | | |
|---|---|---|---|---|---|
| Lagrange | 39.2 | Ottawa River | 26.4 | Sherman | 14.0 |
| Newbury | 38.2 | East Side Central | 25.4 | Pickett | 13.4 |
| Chase | 36.8 | Walbridge | 25.0 | Heather Downs | 13.0 |
| Glenwood | 36.8 | Navarre | 25.0 | Lincoln | 13.0 |
| Reynolds | 35.4 | Old Orchard | 24.8 | Franklin | 12.2 |
| Edgewater | 33.0 | Westfield | 23.8 | Cherry | 11.8 |
| Elmhurst | 31.4 | Marshall | 23.0 | Washington | 11.8 |
| Hawkins | 30.6 | Larchmont | 22.2 | Raymer | 11.0 |
| Keyser | 30.6 | Garfield | 19.0 | Birmingham | 10.6 |
| Spring | 30.2 | Whittier | 17.8 | Stewart | 10.2 |
| Mt. Vernon | 29.2 | Fall-Meyer | 17.8 | Glendale-Feilbach | 9.6 |
| Riverside | 28.0 | Crossgates | 17.2 | Martin | 9.2 |
| Longfellow | 27.0 | Arlington | 17.0 | Gunckel | 8.2 |
| Nathan Hale | 27.0 | Oakdale | 15.0 | Harvard | 8.0 |
| Burroughs | 26.8 | McKinley | 14.2 | Beverly | 6.4 |
| Fulton | 26.6 | King | 14.2 | | |

### Jr. High

| | |
|---|---|
| DeVeaux | 34.2 |
| Byrnedale | 28.0 |
| Leverette | 25.6 |
| Old West End | 24.8 |
| East Toledo | 18.0 |
| McTigue | 15.4 |
| Jones | 14.4 |
| Robinson | 9.8 |

### High School

| | |
|---|---|
| Bowsher | 27.8 |
| Rogers | 23.4 |
| Waite | 18.4 |
| Woodward | 17.2 |
| Start | 16.2 |
| Macomber-Whitney | 16.2 |
| Jefferson Center | 13.8 |
| DeVilbiss | 10.6 |
| Libbey | 9.4 |
| Scott | 4.2 |

## ENROLLMENT PROJECTIONS

| ELEMENTARY SCHOOLS | 1981-1982 | 1982-1983 | 1983-1984 |

| Whittier | 877 | 897 | 898 |

## ELEMENTARY SCHOOLS

Because building capacity is determined by multiplying the number of classrooms by thirty (30), the results of the enrollment to capacity section, Item #3 Enrollment, Current and Projected, may be misleading.

This is due to the fact that many of our schools have a number of special classes that have mandated class size much lower than 25 or 30.

The following is a sampling of the special classes involved:

| Special Classes | Maximum Size |
|---|---|
| EMR - Educable Mentally Retarded | 18 |
| LD - Learning Disability | 10 |
| LD - Resource Room | 8 |
| SB - Severe Behaviorally Handicapped | 6 |
| HI - Hearing Impaired | 6 |
| VI - Vision Impaired | 6 |

In addition to Special Education programs, many of our buildings also have Title I, DPPF and ESAA programs in the area of Supplemental and Remedial Reading, Extended Day Kindergartens and Remedial Math.

All these programs require space and credit a school with no additional enrollment.

These are just a few of the small class size programs that use a full size classroom. Because of this, a building may be utilizing every space even though its enrollment might be much less than capacity.

Schools affected are:

| | SECTIONS | | | SECTIONS | |
|---|---|---|---|---|---|
| SCHOOL | Spec. Ed. | DPPF Title I ESAA | SCHOOL | Spec. Ed. | DPPF Title I ESAA |
| Arlington | 5 | | Lagrange | 2 | 4 |
| Beverly | 4 | | Larchmont | 4 | |
| Birmingham | 4 | 2 | Lincoln | 5 | 6 |
| Burroughs | | 3 | Longfellow | 3 | |
| Chase | 2 | 3 | McKinley | 8 | |
| Cherry | 9 | 3 | Marshall | | 4 |
| Crossgates | 2 | | Martin | 2 | |

EACH FACTOR WORTH 50%

## ENVIRONMENTAL IMPACT (10%)

### RATING OF SCHOOLS BASED ON ENVIRONMENTAL IMPACT

| FACTOR | POOR | AVERAGE | GOOD |
|---|---|---|---|
| 1. Noise Pollution | 0 | 8 | 15 |
| 2. Open Space (Passive Use) | 5 | 10 | 20 |
| 3. Exterior Lighting | 5 | 7 | 10 |
| 4. Site Security | 5 | 7 | 10 |
| 5. Condition of Adjacent Properties | 0 | 8 | 20 |
| 6. Flooding | 0 | 5 | 10 |
| 7. Play Area | 5 | 10 | 15 |
| | 20 | 55 | 100 |

Higher the number --- better the environment

Total per cent --- 10%

Total of factors --- 100%

ALTERNATIVE USES - 10%

| | | | |
|---|---|---|---|
| 1. Expressed Interest | HIGH - 0 | MODERATE - 20 | LOW - 35 |
| 2. Zoning/Possibility or Re-zoning | GOOD - 10 | FAIR - 25 | POOR - 50 |
| 3. Location<br>a. Access to Transportation | GOOD - 0 | MODERATE - 3 | POOR - 7 |
| b. General Considerations | GOOD - 0 | MODERATE - 4 | POOR - 8 |
| TOTAL | 10 | 52 | 100 |

NOTES:

1. Expressed Interest - this factor has to do with whether or not a degree of interest has been expressed by outside parties in the particular property. If it is assessed that a relatively high degree of interest has been expressed in the property, an indication that an alternative use for the property can easily be found, then 0 points would be awarded. If a moderate of interest has been expressed, than 20 points would be awarded, etc.

2. The Zoning factor or the possibility of zoning has to do with whether or not the property is zoned for uses other than school uses or if the property is assessed to have a high possibility of re-zoning. Some alternative uses may not require re-zoning, if this is the case, then the zoning factor should be considered at the same time factor #1 expressed interest is considered.

## MODERNIZATION POTENTIAL (8%)

### RATING OF SCHOOLS BASED ON MODERNIZATION POTENTIAL

| FACTOR | POOR | AVERAGE | GOOD |
|---|---|---|---|
| 1. Age of Structure | 0 | 5 | 10 |
| 2. General Condition of Structure | 0 | 10 | 20 |
| 3. Usage of Structure | 0 | 5 | 10 |
| 4. Renovation Complexity | 0 | 10 | 20 |
